CONTENTS VOL. 101, 1988

Research Papers

A general correction for spontaneous potential well logs in fresh water
C.L. McConnell (Rolla, Mo., U.S.A.) 1
Pumping tests in nonuniform aquifers — The radially symmetric case
J.J. Butler, Jr. (Lawrence, Kans., U.S.A.). 15
A stable isotope study of recharge processes in the English Chalk
W.G. Darling (Wallingford, U.K.) and A.H. Bath (Keyworth, U.K.). 31
The application of probability weighted moments in estimating the parameters of the Pearson Type Three Distribution
D. Song (Nanjing, P.R. of China) and J. Ding (Sichuan, P.R. of China) 47
The determination of probability weighted moments with the incorporation of extraordinary values into sample data and their application to estimating parameters for the Pearson Type Three distribution
J. Ding and R. Yang (Sichuan, P.R. of China). 63
The role of soil organic matter in the geochemical cycling of chloride and bromide
R.G. Gerritse (Wembley, W.A., Australia) and R.J. George (Merredin, W.A., Australia) 83
Hydrogeology of two Saskatchewan tills, I. Fractures, bulk permeability, and spatial variability of downward flow
C.K. Keller (Pullman, Wash., U.S.A.), G. van der Kamp (Saskatoon, Sask., Canada) and J.A. Cherry (Waterloo, Ont., Canada) 97
Hydrogeology of two Saskatchewan tills, II. Occurrence of sulfate and implications for soil salinity
C.K. Keller (Pullman, Wash., U.S.A.) and G. van der Kamp (Saskatoon, Sask., Canada) 123
Prediction of snowmelt rates in a deciduous forest
A.G. Price (West Hill, Ont., Canada) 145
Sensitivity analysis of closed-form analytical hydraulic conductivity models
E. Sidiropoulos and S. Yannopoulos (Thessaloniki, Greece) 159
In-situ method for monitoring layered hydraulic impedance development during artificial recharge with turbid water
W.M. Schuh (Bismarck, N.D., U.S.A.) 173
Stream acidification trends in the Welsh Uplands — A modelling study of the Llyn Brianne catchments
P.G. Whitehead (Wallingford, U.K.), S. Bird (Bridgend, Wales, U.K.), M. Hornung (Bangor, Wales, U.K.), J. Cosby (Charlottesville, Va., U.S.A.), C. Neal and P. Paricos (Wallingford, U.K.) 191
Runoff generation in a low Arctic drainage basin
N.T. Roulet (North York, Ont., Canada) and M.K. Woo (Hamilton, Ont., Canada). . . 213
An extreme-value theory model for dependent observations
J.A. Tawn (Guildford, U.K.) 227
Identification of a multiple input, single output, linear, time invariant model for hydrological forecasting
G.C. Liang (Beijing, P.R. of China). 251
Relationship between glacial geology and streamwater chemistry in an area receiving acid deposition
R.A. Phillips (Buffalo, N.Y., U.S.A.) 263

Sediment transport of the Godavari River basin and its controlling factors
G. Biksham (Montreal, Que., Canada) and V. Subramanian (New Delhi, India) 275
Enhancement of runoff from a small watershed by cloud seeding
A. Ben-Zvi (Jerusalem, Israel) 291
Water resources, salinity and salt yields of the rivers of the Bolivian Amazon
M.-A. Roche (La Rochelle, France) and C. Fernandez (La Paz, Bolivia) 305
Modélisation de la propagation d'un traceur dans une fracture qui se ferme progressivement en profondeur dans l'hypothèse d'un ecoulement laminaire parallèle (Spreading of a tracer in a fracture of which the aperture is decreasing with depth in a laminar flow)
E. Carlier, T. Collet et N. Crampon (Villeneuve d'Asq, France) 333

Discussion

A field study of scale-dependent dispersion in a sandy aquifer — Comment
O. Güven and F.J. Molz (Auburn, Ala., U.S.A.) 359
A field study of scale-dependent dispersion in a sandy aquifer — Reply
S.R. Taylor and K.W.F. Howard (Scarborough, Ont., Canada) 363

Software Review

The Egg — A Technical Word Processing and Desktop Publishing System by G.J. Hockney — D. Stephenson 367
